guest_memfd roadmap - introduction

Thursday 19 September 2024 11:00 (10 minutes)

This session should group discussions on future extensions to guest_memfd, including:

- in-place replacement and userspace mmap of shared pages (https://lore.kernel.org/kvm/20240618-exclusive-gup-v1-0-30472a19c5d1@quicinc.com/)
- large folios
- hugetlbfs
- live migration aka send/receive (pages that are encrypted but accessible from userspace)
