BPF support in the GNU Toolchain

Wednesday 18 September 2024 15:00 (50 minutes)

In this activity we will first provide a very brief update on the status of the port of GNU binutils and GCC to the BPF target, with special emphasis on the level of support for extant BPF programs and the kernel BPF selftests. Then we will address a set of particular issues for which we need feedback from the BPF kernel hackers.
