Rust for Linux Office Hours

Saturday 13 December 2025 17:00 (45 minutes)

A Rust-related BoF to work together on several topics, to answer questions or resolve pain points from attendees, to get to know people interested in Rust and Rust for Linux and generally to have some more time for discussion on top of the Rust MC.

The list of topics will be added closer to the conference (and more may be added during the conference too). Potential topics are:
* Review patches, e.g. [PATCH v13 0/4] New trait OwnableRefCounted for ARef<->Owned conversion.
* Prototype an implementation of a statistical benchmark driver similar to Hyperfine that run as a kunit test or as a loadable module.
* Providing assistance with using pin-init.
* Handling alloc_hooks tags per alloc call site (discussion).

Please feel free to join!
